

CALLAHAM TREMOLO BLOCKS FITTING CHECK

Print this sheet using Adobe Acrobat and be sure to select "ACTUAL SIZE" in the print dialogue box. You can check if it has printed the correct size as the blocks are all 76mm across.

Take your bridge plate and lay it over the image of the blocks below so that the white circles line up with the holes in your bridge plate. If none of them line up then it is most likely that Callaham do not make a block for your bridge.

If you are unsure please contact us so that we can confirm with you.
