

## P Bass

Similar in tone to the original late-'50s split-coil P-Bass® pickups, ours offer high-mids that cut through the mix. You get an open top end with plenty of note attack, presence, and clarity, with defined sub- and low-end frequencies.

Avg. DC: 11.0K

## Jazz Bass

If your bass playing includes slap, melodic lead lines or chords, you'll love our take on the original '60s J-Bass® pickup. It offers a bright and percussive sound with increased mid-range. Available in 4-string and 5-string versions, with black covers.

Avg. DC: Neck 7.9k, Bridge 8.5k
